

Save the date: Saturday March 3, 2018

**Presented by: DUTCHESS
COMMUNITY COLLEGE**

Math & Science Matter Especially for Young Women is a program that offers hands-on workshops in science, technology, engineering, and math. The program is offered to females in grades 5 through 8 and is designed to encourage them to explore continuing their education in STEM disciplines and career opportunities in those fields.

Dutchess Community College has offered ***Math & Science Matter Especially for Young Women*** for the past 21 years. Past participants have had opportunities to participate in hands-on experiments, build solar cars and bridges, solder circuits, create models, code, act as detectives, and in general discover the worlds of geometry, biology, chemistry, physics, fire science, architecture, engineering, economics, coding, art and its connections to mathematics and more.

Information regarding the workshops and registration for the event is available at <https://www.sunydutchess.edu/msm/>

Registration opens Friday February 2, 2018.

If you are interested in receiving further information, please contact Tony Zito at zito@sunydutchess.edu.
